Willing to relocate, can commute reliably

Personal Profile

A flexible, ambitious and reliable individual who is currently studying BSc (Hons) Games Development (Production) at the University of Huddersfield. Using free time to develop and explore various sectors of game dev, such as 3D modelling, texturing, animation and procedural animation. Further at programming in engines such as Unreal Engine and Unity using languages such as C++ and C#.

Education

University of Huddersfield	BSc (Hons) Games Development (Production) (predicted 2:1)		2023 - Present
Huddersfield New College	Digital Media Production (Games)	Ds*	2021 - 2023
	Mathematics	C	
	Computer Science	D	

Experience

FiveM Student Scripter	Freelance	2020 - 2021
☐ Responsible for working on a decently sized project of ~10 developers working on a fairly sized roleplay server at that time (~50 concurrent players). ☐ Demonstrating great communication and planning skills. ☐ Managing and interacting with a community. ☐ Developing basic gameplay mechanics, and collaborating on player heists, vehicles, mlo's and server management tools.		
Kiosk staff & Team Leader @ John Smith's Stadium	Part-time	2024 - Present
☐ Responsible for serving customers, helping with enquiries such as allergen info, and general decision making. ☐ Responsible for maintaining a team of 4+ including the kiosk to clean & efficient standards, maintaining food safety and correct preparation etc.		

- ☐ In charge of customer safety, looking out for potential threats or abuse.

Packer @ Clark Meats

Part-time

2022 - 2023

- ☐ Packing and maintaining quality of product
- ☐ Managing stock database
- ☐ Managing and fulfilling customer orders.

Achievements

- ☐ Won 1st place as designer and programmer in a week-long game jam in the 1st year of University by creating a couch co-op game.
- ☐ Won 2nd place as programmer in a week-long game jam in the 2nd year of University by creating an action stealth shooter.
- ☐ Great working knowledge of game engines such as Unreal Engine 4 & 5, using blueprints, C++, Python integration and API usage.
- ☐ Extensive knowledge of 2D art and animation, 3D art, sculpting, rigging, standard and procedural animation

Notable Projects

- ☐ Design and Development of a Unreal Engine 5 Facial Interaction System that is capable of tracking the players face and triggering in-game events using Python
- ☐ Design and Development of a 'Diegetic Interaction' system that utilises procedural animation to allow players to diegetically interact with their environment
- ☐ Development of custom vehicle physics using ray-casted suspension in Unreal Engine
- ☐ Development of a Blood Bowl inspired, real-time, couch pvp, strategy game consisting of abilities, custom movement code and calculations, complex gameplay mechanics and interactions.
- ☐ Development of a Unity ray-tracer following research papers, allowing full path-tracing of objects within the engine.
- ☐ **Current** - Development of a Unity multiplayer project remastering the game that won 1st place in the 1st year game jam at The University of Huddersfield.

Professional Objectives

Over the next few years after I graduate this coming summer, I wish to build upon my academic knowledge gained within game production and design, working industry standards and methods. I believe I have developed my skills greatly in my time at University and Free time which I wish to get the chance to apply to any position, career or placement. Furthermore becoming a member of any future opportunities or projects.

Thank you for your time. Any references available upon request.
